PROFESSIONAL SUMMARY

Strategic Engineering Leader with 14.5 years of expertise in architecting and scaling high-concurrency enterprise ecosystems across FinTech, Cloud Storage, and Healthcare. Proven trajectory evolving from a high-performance Full-Stack Developer to a Technical Architect, specializing in Java 17, Cloud-Native Microservices (CKAD), and Event-Driven Orchestration (Kafka).

Architectural Vision: Expert in decomposing complex legacy monoliths into resilient, decoupled microservices. Adept at defining Polyglot Persistence strategies (Oracle, MongoDB, Sybase) and Unified API Frameworks to ensure 99.9% availability.

Security & Identity Frameworks: Deep specialization in standardizing Enterprise IAM, architecting secure integration layers using OIDC, SAML, and OAuth2 protocols.

Engineering Governance & AI Innovation: Pioneer in integrating Agentic AI (Windsurf, Copilot) into the SDLC to automate architectural analysis, legacy code refactoring, and high-fidelity data modeling- accelerating delivery cycles while enforcing 90%+ code quality standards.

CORE COMPETENCIES

- Java 17 / Spring Boot
- Cloud-Native Architecture
- Kubernetes (CKAD)
- Event-Driven Kafka
- Microservices Design
- Agentic AI (SDLC)
- Enterprise IAM (OIDC)
- Polyglot Persistence
- API Governance (OAS)
- Observability (Splunk)
- CI/CD / DevSecOps
- Scrum / Agile Leadership

TECHNICAL SKILLS

Backend & Architecture: Java 17, Spring Boot, Microservices, REST, GraphQL, JEE, Hibernate, JPA

Cloud & Platform: Kubernetes (CKAD), PCF, Docker, Jenkins (CI/CD), Spring Profiles

Data & Messaging: Kafka, AVRO, Oracle, Sybase, MongoDB, Liquibase, Lucene Search, Ehcache

Security & AI: OIDC, SAML, OAuth2, ADFS, Windsurf, GitHub Copilot, Agentic AI Workflows

Tools & Quality: Splunk, Grafana, Dynatrace, TDD/BDD, JUnit, Mockito, JaCoCo, SonarQube

PROFESSIONAL EXPERIENCE

DELL TECHNOLOGIES | Software Principal Engineer | Dec 2021 - Present

- Architected the 'Dell Digital Studio - Unified API' for APEX using OAS 3.x, automating API policy updates to reduce manual configuration time by ~70%.
- Integrated Agentic AI tools (Windsurf, GitHub Copilot) into the SDLC to analyze legacy codebases, automate complex code reviews, and efficiently collect/format data for architectural decision-making.
- Engineered a High-Availability Service Orchestrator using Java 17 and GitHub APIs to manage cross-module service consumption, resulting in improved system modularity.
- Directed Kubernetes Orchestration strategy, defining network policies and service configurations for resilient deployments.
- Implemented real-time data synchronization via Kafka and standardized application security using SSO (ADFS-SAML/OIDC).
- Championed Engineering Excellence by mentoring junior staff and enforcing TDD (90%+ coverage) through AI-assisted peer review protocols.
- Recipient of the 'Game Changer' Award for leading technical excellence and driving high-impact architectural results.

JP MORGAN CHASE | Associate Vice President | March 2018 - Oct 2021

- Architected an Investment Proposal platform using Java 8, Spring Boot, and Kafka for real-time data streaming.
- Modernized application security by engineering a custom utility framework for OAuth2/OIDC and Identity Anywhere authentication.
- Developed a Secure Utility Framework for cross-application authentication, standardizing protected API consumption.
- Led development of Scalable DAO Layers using Hibernate/JPA, optimizing data retrieval for high-concurrency Oracle/Sybase modules - reducing query latency by ~30% for high-concurrency modules.
- Utilized Splunk and Grafana for centralized log analysis, health monitoring, and system-wide observability.
- Managed full SDLC using Maven, Git, and CI/CD pipelines while enforcing TDD/BDD (Cucumber, Mockito, JUnit).
- Received Centre of Excellence Award for contribution to global security frameworks.

DELOITTE | Consultant | June 2015 - March 2018

- Served as Technical/Scrum Lead for Gorden Food Service distribution systems; facilitated requirement-grooming and transformation of logistics workflows.
- Architected mission-critical Java 8 Batch Jobs for healthcare systems, processing millions of records with 100% regulatory adherence.
- Optimized portal performance using Ehcache and SQL tuning; managed delivery on Tomcat servers.
- Fortified public-facing portals by integrating Google reCAPTCHA.
- Designed DAO layers utilizing Polyglot Persistence (Oracle SQL and MongoDB).
- Engineered centralized configuration strategy using Spring Boot Profiles to accelerate deployment across environments.

TATA CONSULTANCY SERVICES (TCS) | System Engineer | Oct 2011 - Jan 2015

- Engineered a custom utility for automated PDF collection integrated with EMC Documentum for banking document repositories.
- Developed advanced search functionalities using Lucene Search and maintained validation layers using IBM ODM (JRules).

- Implemented multi-threaded processing via Java Executor Service for high-concurrency banking transactions on JBoss/WebLogic.
- Developed a Global Analytics Module for Product Data Management (PDM) to visualize geographic product engagement.
- Maintained high code reliability through Test-Driven Development (TDD) and JUnit.

CERTIFICATIONS

- CKAD: Certified Kubernetes Application Developer | CNCF
- OCPJP: Oracle Certified Professional, Java SE 6 Programmer | Oracle Corporation
- Registered Scrum Master (RSM) & Registered Product Owner (RPO) | Scrum Inc.
- Organization-Level 'Game Changer' Award | Dell Technologies
- Centre of Excellence Award | JP Morgan Chase

EDUCATION

- B.Tech in Computer Science & Engineering | West Bengal University of Technology (8.6 DGPA, 2011)
- B.Sc. in Zoology (Honours) | Ranchi University
